SOCIAL SECURITY

CERTIFICATION

Pursuant to the provisions of Title 42, United States Code, Section 3505, and the authority vested in me by 45 F.R. 47245-46, I hereby certify that I have legal custody of certain records, documents, and other information established and maintained by the Social Security Administration, pursuant to Title 42, United States Code, Section 405, and that the annexed are true and complete copies of certain of such documents in my custody as aforesaid.

I also certify that the annexed computer printouts showing the dates the information was recorded are true and complete copies of such documents in my custody for Social Security Number [REDACTED] in the name of Paul Michael Graziano.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the Social Security Administration to be affixed this 18th day of April, 2011.

A handwritten signature in cursive script that reads "Georgiana Wilson-Johnson".

SOCIAL SECURITY NUMBER PREFIXES

These prefixes indicate the state in which the Social Security Number was issued. This will assist you in identifying the state in which the individual lived or was possibly born. This is a big help when you're searching the Internet. The prefixes are the first three digits of the SSN. Here is the source of the SSN Prefixes:

| | | | |
|----------------|-----------------------------|--------------------------|-----------------------------|

Administrative Procedure Act (5 U.S.C. 551) - Document
Title (SSN)

Number (SSN)

The SSN used on all SSA's documents has the structure of XXX-XX-XXXX. This structure was used until June 25, 2011. Beginning June 25, 2011 forward, this structure is no longer of any significance. The SSN used on all SSA's documents will have the structure of XXX-XX-XXXX.

Prior to June 25, 2011, the first three digits of the SSN represented the area number. The area number application for an original SSN card.

For administrative purposes, the area numbers ranged from 01 to 99. For administrative reasons, we assigned group numbers in the following sequence:

1. odd numbers from 01 through 09;
2. even numbers from 10 through 98;
3. even numbers from 02 through 08; and finally

Prior to June 25, 2011, the last four digits of the SSN represented the serial number. The serial number represents a straight numerical series of numbers from 0001-9999 within each group.

D. See also

- Information about the SSN is available on SSA's website at: <http://www.ssa.gov/ssa/your-ssn/ssn.html>

Affidavit

STATE OF FLORIDA)
) S.S.
COUNTY OF DUVAL)

I, Felicito Papa, am over 18 years old and resident of 7579 Walden Road, Jacksonville, FL 32244 with FL DL #P100-245-45-082-0. I do not suffer from any mental impairment and can competently attest to the following under the penalty of perjury:

1. I am a professional web developer having graduated with a bachelor's degree in IT or IT Technical Institute in Jacksonville, FL

often used software such as Adobe Photoshop and Adobe Illustrator

2. I downloaded from the official Whitehouse website, www.whitehouse.gov. April

http://www.whitehouse.gov/sites/default/files/press_release/birth_certificate_form-04-10-11.pdf

and the software revealed that this document has many layers of images on it. This indicates that the document was not a true copy of the original birth certificate, but a recently created document using Adobe Illustrator

3. I further observed that this document does not have an unbroken seal normally affixed by US-DHS members to attest to the veracity of governmental record documents

The table consists of several horizontal lines defining rows. The upper portion of the table is mostly empty. In the lower portion, there are some faint, illegible handwritten markings, possibly including a signature or initials, and some very faint text that is difficult to decipher. The overall appearance is that of a scanned document where the table content is largely obscured or blank.

AFFIDAVIT

STATE OF FLORIDA)

Affidavit of Linda Jordan

I, Linda Jordan, am over 18 years of age, I am a resident of King County Washington and have personal knowledge of the facts described below:

1. I have extensively researched the birth record document that Barrack Obama posted on the White House Website on April 27th, 2011.

2. In 2008 Obama posted on his campaign website fightthesmothers.com, what he said was a copy of his short form Certification of Live Birth from the State of Hawaii. (<http://www.fightthesmothers.com/articles/5/birthcertificate>)

3. Obama reported that same document on the White House website on April 27th, 2011. A short form Certification of Live Birth from Hawaii is a computer generated document, an abstract, a slab certificate none of the information found on the original long-form Certificate of Live Birth which is not a computer generated document. (<http://hawaii.gov/health/vital-records/obynmsd.html>)

4. A computer generated, short form Certification of Live Birth (COLB) issued in Hawaii is not acceptable in any other state. COLBs were first issued under Hawaiian law in 1961, the reported year of Obama's birth, a child could be born anywhere in the world and, after returning to Hawaii, the mother could register the birth in Hawaii, in a number of different ways and receive a COLB. Information provided by the mother did not have to be independently verified. See links for relevant Hawaii law: <http://www.compiled.hawaii.gov/hawaii/vital/1960-1969/1961/1961.htm>
<http://www.hawaii.gov/health/vital-records/obynmsd.html>

5. The Hawaii Department of Home Lands will very recently require the original Certificate of Live Birth when filing an application. It is still preferred only from their web site. The Department of Hawaiian Home Lands accepts both a certificate of live birth returned from elsewhere and a certificate of live birth. In fact they are official government records documenting an individual's birth. The certificate of live birth generally has more information which is useful for genealogical purposes as compared to the Certification of Live Birth which is a computer-generated printout that provides specific details of a person's birth.

Health, of Obama's original long-form Certificate of Live Birth. Bauer explained, in detail, the difference between a short-form computer generated Certification of Live Birth, an abstract if you will, and what they say they revealed on April 27, 2011, a photo copy of Obama's original, long-form Certificate of Live Birth.

Bauer stated that this 1961 original Certificate of Live Birth was kept in a "bound book" at the Hawaii DCH. Bauer explained that Obama's lawyer, Judith Cohn, flew to Hawaii and brought the documents back to the United States. At the same time, she also provided a copy of the original Certificate of Live Birth to the Hawaii DCH.

On April 27, 2011, the Hawaii DCH released a copy of the original Certificate of Live Birth to the Hawaii DCH. The Hawaii DCH also released a copy of the original Certificate of Live Birth to the Hawaii DCH.

release of those documents." (<http://www.whitehouse.gov/the-press-office/2011/04/27/press-secretary-jay-carnoy-4-27-11>)

On April 27, 2011, the Hawaii DCH released a copy of the original Certificate of Live Birth to the Hawaii DCH. The Hawaii DCH also released a copy of the original Certificate of Live Birth to the Hawaii DCH.

Certificate of Live Birth:

Health's policy is that any client can obtain two certified copies of his original, "long form" birth certificate.

By a letter, Gov. Obama's lawyer, Judith Cohn, dated April 27, 2011, to the Hawaii DCH, she requested that the Hawaii DCH release a copy of the original Certificate of Live Birth to the Hawaii DCH.

Health's policy is that any client can obtain two certified copies of his original, "long form" birth certificate.

Health's policy is that any client can obtain two certified copies of his original, "long form" birth certificate.

Health's policy is that any client can obtain two certified copies of his original, "long form" birth certificate.

Health's policy is that any client can obtain two certified copies of his original, "long form" birth certificate.

Health's policy is that any client can obtain two certified copies of his original, "long form" birth certificate.

Fuddy continues, "Enclosed please find two certified copies of your original Certificate of Live Birth. I have witnessed the copying of the certificate and attest to the authenticity of these copies."

12. On April 27th, 2011 the Governor of Hawaii, Neil Abercrombie, put out a press release supporting Fuddy's actions: "In 2001, the Hawaii State Department of Health began computer-generating vital statistics records. Since then, its longstanding policy and practice has been to issue and provide only the computer-generated records. The Department has not issued any original birth certificates since 2001. The Department has issued a limited number of original birth certificates."

13. The document Obama posted on his website is not a birth certificate. The document is not called a Certificate of Live Birth nor a Certificate of Live Birth, which is the reserved title for the original, long-form, birth certificate. This means that the computer-generated document Obama posted on April 27, 2011, that has multiple typos and is titled a Certificate of Live Birth, can not be a scanned copy of an original birth certificate. <http://www.governor.hawaii.gov/pressroom/press-releases/hawaii-governor-announces-2011-04-27>

president-obamas-request-for-certified-copies-of-long-form-birth-certificate, and phone conversations)

I declare under penalty of perjury, that the above is a true and correct statement of the facts.

Self Check: Notice of Mismatch with Social Security Administration...

https://selfcheck.irs.eis.gov/SelfCheckUI.ssaContact.html

Self Check™

Notice of Mismatch with Social Security Administration (SSA) Records

Bring this notice with you when you visit SSA.

For SSA Field Office Staff, do not use E-STAR, see Form 10420-00011

Name of the employee (Last Name, First Name, MI)

Date of Mismatch

Employee's Social Security Number (SSN)

Case Verification Number

SSN does not match. The Social Security Number (SSN) entered in Self Check is valid, but the name and/or date of birth entered do not match SSA records.

SSN is invalid. The Social Security Number (SSN) entered in Self Check is not a valid number.

SSA unable to confirm U.S. Citizenship. Cannot confirm that the employee is eligible to work because the SSA records do not show that the SSN Holder is a U.S. Citizen.

SSA record does not verify. Other reason. SSA found a discrepancy in the record.

May 22, 2011

Revised and Expanded Affidavit

I, Douglas B. Vogt, am over 18 years old, do not suffer from any mental impairment, have personal knowledge in the following and attest under penalty of perjury that I have knowledge and expertise in documents, imaging, scanners and document imaging programs. Based on my knowledge and expertise the following is true and correct

My Credentials

I have a unique background for analyzing this document. I owned a typesetting company (Nova Communications) for 11 years and I have owned and operated the business since 1992. I have owned and operated a business since 1992 which sells all types of document imaging equipment and document imaging software (TheRepository). I know how the scanners work and their capabilities. I have also sold other document imaging programs such as Laser Echo, Libris and Axioms. I have sold and installed numerous imaging systems in libraries and various governments, so I know their procedures with imaging systems and everything about the design of such programs. This will be important in understanding what has happened with Obama's Certificate of Live Birth. I also have a great working knowledge in various IT hardware and hardware.

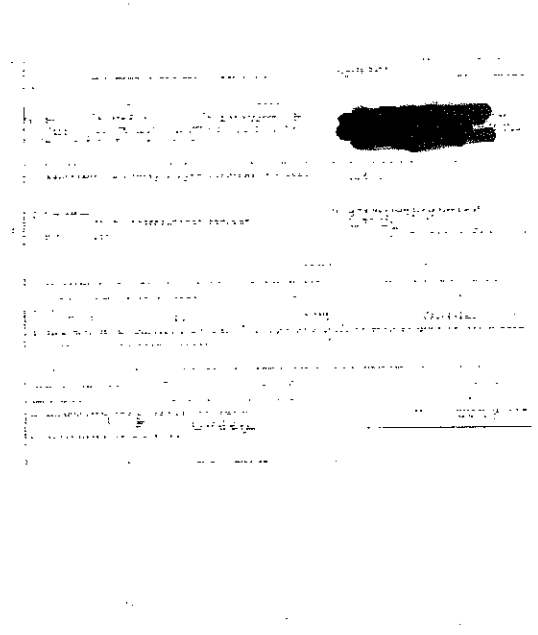

Figure 1. Pdf image of the Obama's Certificate of Live Birth dated August 2, 1961.

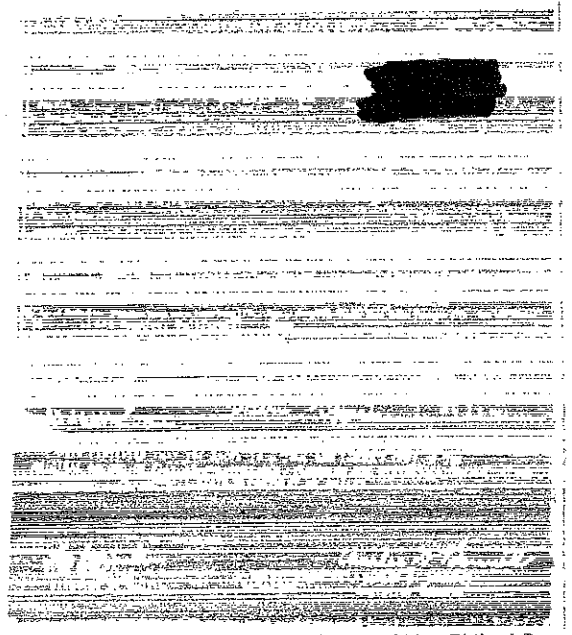

Figure 2. The microfilmed Certificate of Live Birth of Susan Nordyke dated August 11, 1961

background and instructed the program to bring the type "forward" it blanked out the background image, hence the halloing effect around the type.

URN, NO RECEIPT NECESSAR

SECURITY PACII
 Ventura & Sepulver

 Sherman Oaks, Ca

Ventura & S
 15165 Vent

Figure 8. Binary image.

Figure 9. An enlarged version of Figure 6 showing grayscale type.

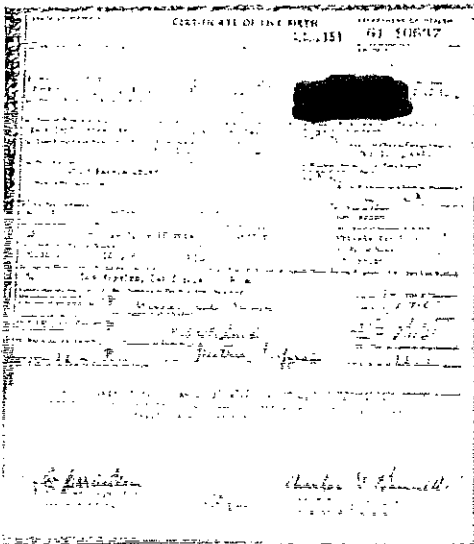

Figure 10. Inverted image of Figure 2.

2. The *Obituary Certificate* is loaded with both binary and grayscale letters which is yet another smoking gun that this form is a forgery. It appears the lines and some of the boxes were scanned using grayscale, but only some of the form headings were grayscale and sometimes it is only some letters. Figure 11 and Figure 12 give one example. You will notice that the *H* and *L* in Hospital, *I* in Institution, *H* and *W* in the *h* and *l* in hospital were grayscale images, but the rest of the line is binary. The typewriter line below was scanned in as a binary image. I can also tell you for certainty that the form type was scanned in at a lower resolution (200 dpi). This is because of the size of the pixels in the letters were such that the openings on the *a* and *s* on the last line are not visible and filled in. This may also further indicate that forger took some of the type images from the microfilmed copies.

Figure 15 Two different colors, dark green and black.

The same thing is found in form box 20 "Date Accepted by Local Reg." Figure 16 again shows that the date has two different colors. The "AUG 8 1966" is in dark green (R-87, G-111, B-87) and the "1" is in black. Yet again another irrefutable proof this form is a forgery. Form box 17a displays

The official seal of the Government of Hawaii shall be obtained in duplicate and one copy of the same shall be the property of the State of Hawaii. In the case of a copy made for a use other than that of the Government, a proper and complete copy shall be made which has the same appearance as a correct copy of such one. The duplicate shall be "HAWAII, HAWAII."

FIGURE 17 Head of Governor's Seal 1966 FIGURE 18 Seal of Hawaii 1966 FIGURE 19 Governor's Seal 1966

The seal of the State of Hawaii is a circular seal with a diameter of 1 1/2 inches and a thickness of 1/8 inch. It is used for the purpose of authenticating documents and is placed on the bottom of the 11 inch paper. That told me the Health Department is using an official sealer, which applies embossing pressure to leave a clearly visible impression. I had seen seals with a diameter only 1/2 inch or less, clearance for a 1/4 inch seal, from the edge of the paper. The Health Department seal does not appear obvious on the Okawa COLP. A good embossment will

This letter may have been accompanied by a CD with the files and images I worked from and the screen shots displayed in this report. I have also included MP4 files of the three videos listed below. You may freely use these images and text for your own report or public notice.

[Faint, mostly illegible text, possibly a list of files or links]

I have attached MP4 files on the enclosed CD with this report and you can view/download it from the [illegible] website. I have also included MP4 files of the three videos listed below. I was working on a 111.1 (18.75 MHz) out of that MP4 [illegible] file. I was working on the [illegible] file. I was working on the [illegible] file. I was working on the [illegible] file.

[Faint, mostly illegible text, possibly a list of items or a table]

[illegible] the layer that contains most of the forms text and typewritten text.

A Rebuttal to the Discovery of the Multi Layers Found in the PDF File.

The only rebuttal to the nine layers discovered in the PDF file released by the White House was a statement from a Canadian graphic artists from Quebec by the name of Jean-Claude Tremblay on April 29. It was reported by Fox News and on their web site at:

He tries to excuse the multi-layers as merely an artifact of an OCR (Optical Character Recognition) engine and then saved as a PDF. There are two major reason he is wrong and I know from his statement he knows nothing about OCR engines and how they work and their file structure. First of all the Obama PDF certificate was supposed to have come directly from the Health Departments office. As stated before, the records they have would have absolutely no reason to be OCR'ed and if they were asked to give the customer a PDF image it would be from their existing PDF image stored in their document imaging program on the server. The program would have done the OCR as part of the imaging process.

My qualifications on OCR programs are considerable. My own document imaging program, Hightopo.com, has an OCR option from Hightopo that is called TypeReader. We integrated this into our client's back end PDF, which an OCR program creates a file as a searchable PDF, and the content is stored in the back end. The quality is compressed. I have used all the options in the program. The program is for the image file and the content is stored in the back end. The program is for the image file and the content is stored in the back end. The program is for the image file and the content is stored in the back end.

Conclusion

The existence of the multi-layered PDF file is not a result of an OCR engine.

I, _____, do hereby certify that the foregoing is true and correct.

NAME OF INDORSE

Witness my hand and official seal this the 22nd day of May, 2011.

When the document administration released is a PDF image that the document tries to pass off as a Certificate Live Birth Long Form printed on green security paper by the County Health Department. The form is a created fudging for the following reasons:

2011 RELEASE UNDER E.O. 13526

1960s, these were an elaborate scanning and data processing system. The type design in Figure 8 looks Roman but they could never replicate the exact design. They were stuck having to use existing forms that were scanned in using binary and grayscale.

2. There is a white halftone around all the type on the form. Figure 5 is an example of this. This effect should not appear on a scanned grayscale image. Figure 6 is a grayscale image scanned in at 140 dpi. You will notice that there is no halftone effect around the type and also the security pattern is seen through the type. Figure 7 is a color image where you can clearly see the security green color through the type and no halftone. Figure 8 shows a Black and White (Binary) image of the same type. The important thing to remember is that you cannot have grayscale and binary on the same scan unless the image is a composite. That means that different components of the whole image are made up of smaller parts. Figure 9 is an enlarged version of Figure 6 showing what grayscale letters should look like compared to binary.

Name (Type or print)

Figure 5. Original form

Figure 6. Grayscale

Figure 7. Color image.

The following addresses

Figure 8. Binary image

Figure 9. An enlarged version of Figure 6 showing grayscale type.

3. The 1960s machine is loaded with both letters and grayscale letters which is just another smoking gun that this form is a forgery. It appears the lines and some of the boxes were scanned using grayscale, but only some of the form headings were grayscale and sometimes it is only some letters. Figure 10 and Figure 4 gave one example. You will notice that the *ff* and *ai* in Hospital, *i* in Institution, *ff* and again the *h* and *i* in hospital were grayscale images, but the rest of the line is binary. The typewritten line below was scanned in as a binary image. I can also tell you for certainty that the form type was scanned in at a lower resolution (1200 dpi). This is because of the size of the pixels on the letters were such that the openings on the *a* and *n* on the first line are not visible and filled in.

Figure 10. showing a mixture of grayscale and binary type on the same line.

Another example is found in form box 1a, his name *BARACK*. For some reason the "R" is a grayscale image and the rest is binary (Figure 11). That means the "R" was originally on the form and the rest was not until it was added.

Figure 11. Another example of grayscale and binary on the same line.

Another example is the Certificate number itself (Figure 12). The last "1" on the form is a grayscale image but the rest of the numbers are not. This is just another example of a cut and past job. It also means we do not know what the real Certificate number is if there even is one. There are other form boxes that display the same feature, boxes: 5b, 7c, 11, 13, 16, 18a.

Figure 12. The last "1" is grayscale, but the rest are binary.

4. The Sequential Number is a fraud. I would like you to refer back to Figures 1 and 2. You will notice that Barack Obama was supposed to have been born on Friday at 7:04 pm August 8, 1961 and the local registrar accepted it on Tuesday August 8, 1961 and hand stamped the Certificate number 761 10641. Then notice that the other Certificate of Susan L. Nordyke was born on Saturday at 7:12 pm August 5, 1961 and another registrar had stamped it on August 11, but her Certificate number is 761 10641. Keep in mind there would be only one birth stamp machine in the office so the numbers would all be unique. There cannot be any duplicates so every Certificate has a unique serial number. Obama's Certificate would have most likely been mailed on the following Monday, the 14th and received by the Clerk on Friday, the 18th. Susan Nordyke's Certificate looks like it was mailed sometime earlier that week and not accepted until the 11th but she has a Certificate # numbers less than Obama's. It is impossible to have Obama's Certificate number to be four numbers less than Susan Nordyke's.

The facts I have shown you in #3 and 4 tell us several things about how this forgery was assembled. 1. Some persons in the Health Department, who had access to the document printing process, copied the numbers for Obama's date of birth and found someone near the 1st of August. They may have crossed referenced the death database to find someone who had died and had a birth date close to Obama's. If you remember, the Federal Government wanted the date to appear like the black and white numbers on the database would look like information. 2. The date stamps have two different colors and sizes (see #5 below) which indicates that both dates came from different Certificates. 3. More than one person is involved in the Health Department of Health in assembling the different components that were used for the duplicate certificate to find the right date for the birth. 4. The birth certificate was signed by the father, mother, Birth and family sign the fraudulent certificate. I believe that after all the components were
